Frederick, MD

[GitHub](#) | absurdlyeloquent.github.io | [LinkedIn](#)

Full-stack software engineer. I strive to strike the perfect balance between design and functionality, front end and back end, and user and developer experience.

SKILLS

- HTML5/CSS3
- JavaScript/NodeJS
- Python
- ReactJS
- Git/GitHub
- Django
- PostgreSQL
- MongoDB
- Heroku
- Linux

SOFTWARE PROJECTS

<Developer-Verse/>

A full stack app for developers to share their software projects. It uses ReactJS on the front end, Django and Python on the back end and PostgreSQL for the database. Netlify and Heroku were used for deployment.

- Repository: github.com/SEI-39/developerverse
- Live: developerverse.netlify.app

Zerg Rush

A full stack app for reviewing games. It uses ReactJS on the front end, ExpressJS on the back end and MongoDB for the database. Heroku was used for deployment.

- Repositories:
 - Front end: github.com/AbsurdlyEloquent/game-review-api
 - Back end: github.com/iandemed/zr-game-informer-api
- Live: absurdlyeloquent.github.io/game-review-api/

Astronomy Picture of the Day (APOD)

A front-end built in ReactJS for NASA's APOD API. Showcases astronomy pictures and descriptions with selectors for date.

- Repository: github.com/AbsurdlyEloquent/responsive-website
- Live: absurdlyeloquent.github.io/responsive-website/

EDUCATION

General Assembly – Software Engineering Immersive

July 2020 – October 2020

Completed a twelve-week full stack development immersive. Studied front end, back end and databases in depth.

Frederick Community College – General Studies

September 2018 – July 2019
